# KBP 14 - 20

The KBP 14-20 is a pallet truck with a load capacity ranging from 1.400 to 2.000 kg, designed for short-distance transport in various indoor environments such as retail stores, supermarkets, and DIY shops. Its compact chassis and creep speed function make it ideal for confined spaces, ensuring precise handling of goods. Weighing 175 kg, it's suitable for use on tail and freight lifts. The 5-point chassis provides stability, especially during the transport of taller loads. Its low chassis (700 mm) ensures clear visibility of the fork tips and load, improving both safety and speed in pallet handling. Equipped with a 48-Volt lithium-ion battery, the truck allows for easy opportunity charging at any 230-Volt socket. The on-board

charger offers fast charging, reaching full capacity in just 2 hours when fully discharged. The available batteries (48 V / 20 Ah and 48 V / 30 Ah) ensure a high energy reserve (0,96 – 1,44 kWh); this energy, combined with low energy consumption, provides impressive autonomy. The KBP 14-20 features ergonomic controls for ease of use, a long tiller arm for better maneuverability, and a keypad for secure access. The KBP 14-20 operates at a maximum speed of 5.0 km/h, with gradeability reaching 16%. Designed and manufactured by KION Group, this pallet truck represents superior quality compared to other models on the market.
